

Adobe Reader and Adobe Flash Player

Adobe Acrobat Reader is a software program that comes on all computers. It is the program that is universally used to open documents in the event that a Word processing program isn't on the computer.

These documents are saved as a .pdf, (Portable Document file). This file option is listed as a File Type in Word processing programs. Click on the arrow to view the file types and click on .pdf.

Adobe Flash Player is a software program for viewing animations and movies using computer programs on the computer as well as on the Internet. Many programs and games require Flash Player. YouTube is an example of a website that requires Flash Player.

These programs are free and are automatically installed on computers. They do require occasional updating and you will be prompted to do so by a pop up in the lower right corner of your screen. When prompted, click on Update.

After download is complete, a dialog window opens on your desktop:

-  Click on Install
-  Click in the box before 'I have read and agree to terms.....'
-  Click on Install
-  Click on Done
