

Training Service Website Design

## Downloading

-  Downloading is simply copying something from the Web/Internet to your computer.
-  It can be a program, a photo, a game, etc.
-  Technically when you save a photo you received through email, you are downloading it to your computer.
-  If you are on high speed Internet, this process usually goes quite quickly.
-  Only download from legitimate/trusted sites. If you are unsure of the site, error on the side of caution and don't download.
